A Word From Our Director

MARK SEGAL, M.D., PH.D
SENIOR ASSOCIATE DEAN FOR FACULTY AFFAIRS & PROFESSIONAL DEVELOPMENT

Welcome to the MD-PhD Program at the University of Florida, where we redefine excellence through a unique blend of community, holistic training, and personalized concentration options. Unlike conventional MD-PhD Programs, ours stands out for several reasons:

1. Community-Driven Support: Our program fosters a vibrant community of physician scientists who navigate the MD-PhD journey together, offering mutual support and encouragement every step of the way.

2. Holistic Training Philosophy: Just as we approach admissions with a holistic perspective, our training goes beyond the mere acquisition of MD and PhD degrees. We prioritize comprehensive development, offering team-building activities and leadership initiatives to equip you with the skills necessary for a successful career as a physician scientist.

3. Personalized Concentration Options: Recognizing the complexity of healthcare challenges, we empower our Scholars to pursue a PhD concentration aligned with their passions. By embracing diverse approaches, we believe in cultivating innovative solutions for the most pressing issues in healthcare.

We invite you to explore our program further and discover if it's the perfect environment for your academic and professional growth. Join us in reimagining the future of medicine."
About The Program

In 2007, the UF MD-PhD training program was established to prepare the next generation of physician scientists for impactful careers which integrate biomedical science and clinical medicine. The current program is a collaboration between UF’s College of Medicine and the UF Clinical and Translational Science Institute. This program is fully-funded, inclusive of all health majors and disciplines and integrates clinical research with practical training opportunities within UF’s Health Science Center (HSC).

"UF’s MD-PhD program has provided an immense amount of support and motivation since my interview day. This program makes me believe that my dreams of medical research and service to the community will come true!"

--CARETIA WASHINGTON, MD-PHD SCHOLAR
Scholar Wellness Committee

The Wellness Committee is a subcommittee of the MD-PhD Scholar Council. Under the leadership of the Wellness Chair, these scholars foster camaraderie between students within our program.

With financial support from the Program Directorate, Wellness events are designed by a committee of scholars from the UF MD-PhD Scholar Council to promote camaraderie, peer support, and long-lasting relationships between scholars.
